

ANNEX A – D1. PROPOSAL FORM

This initiative is anchored in the objective of advancing equitable access to health products with a focus on dengue, while upholding the principles of equity, solidarity, sustainability, and ethics. As stated in the Call for Proposals, it recognizes the urgent need to enhance access to health technologies in order to address longstanding structural asymmetries, including limited and concentrated capacities in science, research and development (R&D), and manufacturing; fragile and fragmented supply chains; regulatory asymmetries; and insufficient integration between innovation, production, and access, particularly in developing countries.

The Coalition seeks to bring together and support initiatives that contribute to reducing these inequities, especially those affecting neglected diseases and persons in vulnerable situations, while promoting a shift in the centre of gravity of R&D and manufacturing capacities. At the same time, it aims to foster efficient, ethical, equitable, sustainable, and affordable access to innovation.

Dengue continues to impose a significant and disproportionate health burden globally, particularly in developing countries, reflecting persistent gaps in access to effective health technologies and enduring structural inequities in global health innovation and production systems.

1. PROJECT IDENTIFICATION

Please provide the basic identification details of the proposed project.

Project title	
Lead applicant organization/institution	
Country of lead applicant	
Co-applicant(s) organization/institution	
Country of co-applicant(s)	
Type of Health Technology (e.g., vaccines, therapeutics, diagnostics)	
Target Region(s)	
Key Implementation Country(ies)	
Project duration (years and months)	
Required funding amount (USD)	

2. LEAD APPLICANT INFORMATION (200 words)

Please briefly provide the following information regarding lead applicant organization:

- Mission and institutional mandate
- Relevant experience in health technology research, development, innovation, manufacturing, or access Previous experience managing projects of similar scale and complexity
- Institutional capacity to coordinate multi-partner initiatives.
- Legal status
- Headquarters location
- Year established
- Website
- Contact person
- Contact email

3. CONSORTIUM AND PARTNERSHIPS

Please describe the consortium structure, as applicable, and list partner organizations involved in the project, explaining their respective roles. Type of institutions might include, for instance, private sector companies, non-governmental organizations (NGOs), international organizations, public institutions and government entities.

Partner Organization	Country	Type of institution	Role in project

4. PROPOSED PROJECT SUMMARY (Up to 500 words)

Please provide a concise summary of the proposed project, including:

- the problem the project aims to address
- the objective of the proposed project
- the proposed solution or innovation
- the target population or region
- the expected results and impact.

5. PROBLEM STATEMENT AND CONTEXT (400–500 words)

Please describe the challenge or gap the project seeks to address:

- explain the relevant health, manufacturing, or access challenge
- provide evidence or data supporting the need for intervention
- describe regional or global inequities in access to the relevant health technologies
- explain why addressing this challenge is important for health equity.

Applicants are encouraged to reference epidemiological data, supply chain limitations, manufacturing capacity gaps and market failures or barriers to access.

6. PROJECT OBJECTIVES (150–200 words)

Please clearly state the overall objective and specific objectives of the project. Objectives should be clear, measurable and aligned with the goals of the Coalition.

7. PROJECT APPROACH AND METHODOLOGY (500-600 words)

Please describe the approach and methodology that will be used to achieve the project objectives, including:

- the proposed technical and operational approach
- key activities required to deliver results
- how the project will strengthen local or regional production capacity
- how innovation will be incorporated in the project design.

Applicants should also inform:

- pre-existing intellectual property (IP) related to the product/technology, where it was claimed, relevant licensing agreements and how IP will be managed in support of the goals of the project

- any pre-existing access commitment and its scope
- technology transfer mechanisms intended to be adopted and their scope
- research and development components
- regulatory and supply strategies
- collaboration with local partners.

8. EXPECTED RESULTS AND IMPACT (300–400 words)

Please describe the expected outputs, outcomes, and longer-term impacts of the project:

- identify measurable outputs
- describe expected outcomes for health systems or populations
- explain how the project will contribute to **equitable access to health technologies**.
